

NAME: _____ PER _____ DATE _____

Motivationally Diseased Athlete

Project 14.1

Side 1

Create a hypothetical athlete who exhibits one of the “Motivational Diseases.” Be descriptive. Include age, sport, background, sport history, and unique potentials or challenges, but do not use the name of his motivational disease. Imbed the symptoms and causes of it into your description. Bring this character “alive” and use your background in sport to help you create via other athletes you have known. Use Side 1 to write it out. (Side 2 is for a classmate to fill out.)

Portrait of your athlete

Side 2

Exchange worksheets with a classmate.

On the front side of the worksheet, read the description of this hypothetical athlete. Compare the description with what you know about the motivational diseases.

Answer the following questions.

Your Name: _____

Diagnosis (What disease you think the athlete has?)

Treatment (What do you prescribe for this athlete to do in order to be “cured”? Be specific.)
